

SIGMA-ALDRICH® ESSENTIALS LABWARE

Sigma-Aldrich Essentials Labware is a range of day-to-day laboratory glassware and plastics manufactured following the high quality standards customers have come to expect from the Sigma-Aldrich brands. The volumetric glassware is manufactured to both ASTM and ISO standards to serve the global markets.

The Product Line Consists of these Categories

- Glass Beakers
- Bottles (plastic and glass)
- Carboys and Jerrycans
- Desiccators
- Dishes (crystallizing, evaporating, petri)
- Flasks (boiling, erlenmeyer, filtering, volumetric)
- Glass Cylinders
- Sample Jars
- Tubes (culture, test and micro)
- Volumetric Pipettes
- Wash Bottles

Premium Quality Glass and Plastics

- Essentials beakers and flasks are manufactured with 10-12% more glass by weight than equivalent leading brands
- Raw plastic materials used for manufacture are 100% Virgin and FDA compliant. Colored products use food grade color
- All plastic bottles are leak tested
- Heavy uniform walls and rounded corners
- Large graduations and marking spots on all glassware
- Thick, uniform beaded rims on glassware

Pricing

Sigma-Aldrich Essentials Labware is priced 10-20% less at list than other equivalent brands. Substantial discounts available for large volume orders.

Packaging and Inventory

Plasticware is available in case quantities with inventory held locally. The glass beakers and flasks are individually wrapped in clear plastic to keep them clean and dust free and then packed into case and shelf packs. Case size packs and shelf packs with inventory held locally. Call off and on-site stocking solutions available.
